Dispatcher
Paragon

DISPATCHER PARAGON CLOUD FAX

REDUCE YOUR TOTAL COST OF MFP OWNERSHIP WITH KONICA MINOLTA DISPATCHER PARAGON CLOUD FAX EXTENSION

Dispatcher Paragon provides centralized print management allowing you to reduce print, scan, and copy costs. Productivity and document security are improved through automated scan workflows and pull-printing. Paragon can even contribute to organization sustainability initiatives by eliminating single-sided printing.

Now Dispatcher Paragon can save you even more by adding a Cloud Fax extension. The Cloud Fax extension eliminates the need for expensive MFP fax kits and analog/VoIP telephone lines.

After a one-time configuration charge, 1,000 pages per MFP per year are included for the duration of an active maintenance contract. These pages can be shared and used across the entire fleet. The Cloud Fax feature is embedded into the MFP making it ideal for simple fax workflows. For your convenience, incoming faxes can be received as an email, stored to a network directory, or automatically put into a secure queue to be released at any time.

DISPATCHER PARAGON CLOUD FAX SOLVES TRADITIONAL FAX ISSUES

COST SAVINGS

Removes all analog or VoIP fax telephony related costs. Achieve immediate savings on telephony costs and ROI in one year, in most cases.

DIGITAL EXPERIENCE

Outgoing fax statuses provided via email. Incoming faxes are emailed to the recipient as a PDF attachment or delivered to your secure print queue for release.

INCREASED FAX UPTIME

Unlike VoIP services, Dispatcher Paragon Cloud Fax offers high availability with redundancy and uptime enhancements without added telephony hardware.

HIGHLIGHTS

- Replaces expensive analog lines, unreliable VoIP, and MFP fax kits.
- Reduces unwanted help desk calls.
- Reliable fax usage reports.
- Faxes received as an email, stored to a network directory, or securely held.
- 1,000 pages per MFP per year (additional pages can be purchased.)

INCREASED DOCUMENT SECURITY

- Provides HIPAA and PCI-DSS compliant internet faxing with the benefit of sending/receiving secure faxes from the convenience of your MFP or desktop.
- The Cloud Fax feature is committed to offering the highest level of secure service, with TLS/PKI encryption for incoming and outgoing faxes, "Delete Fax After Completion" feature and user authentication.
